BENEFITS OF NATURE PROGRAM
Pre- and Post-Activities for Grades 3–12

ACTIVITIES

Investigate Horticultural Therapy

Curriculum Connections: Career Development

Required Materials: Computer

Description: Explore these online resources to learn about horticultural therapy as a career.

https://www.htinstitute.org
https://www.ahta.org

Extension/Modification: Students can share what they learned in small groups or present to the class.

Aromatherapy Research

Curriculum Connections: Science

Required Materials: Computer; optional: different essential oils like peppermint, lavender, rose, lemon, etc.

Description: Have students research the topic of aromatherapy and the types of plants that might be used to spark certain feelings like sleepiness, calmness, energy, etc. Students can look at websites or academic papers.

The links below are just a few places that describe aromatherapy. Students are encouraged to go beyond these websites and do additional research.

- https://www.healthline.com/nutrition/what-are-essential-oils#what-they-are
- https://naha.org/

Extension/Modification: Students can present their findings in small groups or to the class. Additionally, the class can pass around and smell the different essential oils researched.
Plant an Herb Garden

Curriculum Connections: Science

Required Materials: Mint, parsley, chives, oregano, or other herb seeds, a few containers with holes for drainage, soil, water, pencil, paper, ruler

Description: Have students plant different types of herb seeds in separate containers and place on a sunny windowsill. Observe the herb plants as they grow and have students record observations in height, color, and rate of growth.

How to grow your herb garden:

- Plant each type of herb seed in separate containers.
- Fill container with soil.
- Create a hole in the soil about as deep as your fingernail, place a seed in the hole, and cover with soil.
- Place all containers in a sunny window and water periodically, keeping the soil moist.
- The seeds will germinate in about 1-2 weeks. Depending on the type of herb, it may take several weeks to months until the plant is ready to harvest.

Extension/Modification Activity: Students can research recipes that utilize the types of herbs they are growing. Once the herbs are ready to harvest, have students use them in a dish or meal.

Relax Outdoors

Curriculum Connections: Environmental Education

Required Materials: Outdoor space for students to use; optional: cushions, rugs, wind chimes, art, plants

Description: Have students create an outdoor space for relaxation and tranquility to alleviate stress. Fill the space with soft places to sit, like cushions or rugs, relaxing sounds, like wind chimes or running water, as well as art and plants.

Extension/Modification Activity: Students can research colors, art, or plants used in relaxation or meditation practices.
Natural Art

Curriculum Connections: Art

Required Materials: Computer, art supplies – natural materials (leaves, stones, flowers, etc.), paper, pencil, crayons, paint, markers, glue, etc.

Description: Students should research artists that use natural materials, create their art in nature, or create art inspired by nature. Have students create their own nature inspired art based on what they’ve researched.

Extension/Modification Activity: Have a student art showcase where students can display art or photos of their art. Students can also present about artists that inspired their personal artwork.
