Longwood Gardens
Public Safety CCTV System Expansion Project
FAQs
Addendum

The below questions were received and answered to prospective vendors during the open visitation period of 10AM and 2PM on Thursday, September 26, 2024. The answers are being made available to all interested parties.

Q: *What is the make/model of the current switches used by Longwood Gardens?*

- As noted in the background section of the RFP, Longwood Gardens current systems utilize HPE Aruba switches. The current specific model number is JL679A.

Q: *What is the make/model of the current storage arrays used by Longwood Gardens?*

- Longwood Gardens current storage arrays are Dell PowerVault model MD3800i. The technical specifications for this RFP are not consistent with that model, and the intent is to acquire an array with other capabilities.
